

## Data Collection Worksheet

**Please Note:** The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

### The Global Appraisal of Individual Needs-Initial (GAIN-I)

The Medical Cannabis Use, Polysubstance Use, and Recovery (MCPR) Working Group (WG) recommends that investigators collect items S10 and S10a from the Global Appraisal of Individual Needs-Initial (GAIN-I). Item 10 asks how soon the respondent will need help with their alcohol or drug situation (e.g., right away, within 3 months or longer, already getting help, and no help needed, etc.). Item S10a asks the respondent if they want more help in specific areas of their life (e.g., with alcohol or drug use, situation at home or work, detoxification, treatment, medication, etc.).

The GAIN-I is a proprietary instrument and administration requires a licensing agreement from Chestnut Health System:
